

UBIQUITI USW-WAN 10G SFP+ WAN SWITCH

Model: USW-WAN

Manufacturer: UBIQUITI NETWORKS

EAN: 810177160113

Product Code: 1065591

R7,340

The Ubiquiti UniFi WAN Switch offers robust performance for modern networking needs. It supports a variety of high-speed connections, including 10G, 5G, and 2.5G interfaces alongside Gigabit options, ensuring flexibility in setup and scalability for future enhancements. With a maximum switching capacity of 20 Gbps and a forwarding rate of 15 Mpps, this switch supports efficient data handling and minimal lag, making it suitable for high-demand environments.

Built for reliability, the Ubiquiti UniFi WAN Switch features a sturdy SGCC steel housing and includes essential safeguards like a 16KV air-gap and 22KV contact discharge ESD protector. The included rack mounting kit ensures straightforward installation, while the manageable design allows for easy monitoring of system status and Ethernet link activity. With a temperature operating range from -5°C to 40°C and support for humidity levels up to 90%, this switch is adaptable for various environments, making it a valuable asset for any organization looking to enhance its network infrastructure.
