

BenQ PD2770U computer monitor 68.6 cm (27") 3840 x 2160 pixels 4K Ultra HD LCD Black

Model: 9H.Y0ELB.QBE

Manufacturer: BENQ

EAN: 4718755097416

Product Code: 1061789

R39,065

Always Accurate and Consistent Colors for Creative Individuals and Studios

Accurate Colors, Right Out of the Box

Reliable Quality for Studios

Developed beyond standard compliance, BenQ AQCOLOR technology ensures corner-to-corner uniformity and precision with 99% Adobe RGB, 99% DCI-P3, and 100% Rec.709 coverage. This gives

professionals confidence that their colors remain consistent from first draft to client delivery.

No dim corners, no uneven tones. Just consistent brightness and color across the screen, thanks to BenQ corner-to-corner uniformity. Now you can create with confidence.

Smooth gradients, natural transitions, and shadow details that stay true for 2D and 3D work, powered by BenQ-exclusive dark tone calibration. The result: sharp focus and immersive storytelling.

Precision from Panel to Production

Corner-to-Corner Uniformity Control

Brightness and Color Consistency across the Screen

Color Tolerance Management

High-Precision Instrument Alignment

Industry Standards Compliance

From Rec.709, DCI-P3 to Adobe RGB and Beyond

Certified Accuracy by Leading Third-Party Authorities

Color Management Simplified

For creative teams, every color decision matters. BenQ color management solutions keep colors consistent across displays and projects, with no extra tools, no added workload, and no wasted hours.

Hardware Calibration

1. Accuracy That Doesn’t Drift

By adjusting the monitor’s LUT directly, hardware calibration keeps colors consistent across devices and over time. It prevents drift, time-consuming project reworks, and ensures client-ready results every time.

Built-in Calibrator

2. Pro Accuracy with Zero Hassle

With calibration built directly into the monitor, you get pro-level accuracy without extra devices or added costs. Just reliable precision at your fingertips.

Light-Adaptive Calibration

3. Calibration Optimized for Your Lighting

Our Light-Adaptive Calibration senses your studio lighting, then adjusts automatically with optimal settings. The result is precise, environment-specific color—effortless and ready to use.

Automatic Scheduling

Calibration on Your Schedule

Manual calibration is easy to forget and can disrupt tight deadlines. With automatic scheduling, the monitor calibrates after hours, so your studio starts each day with precise, ready-to-use color.

DMS Local

Centralized Color Management Simplified

With DMS Local, a single PC manages every monitor in your studio. Sync color settings across the team and schedule automatic calibrations over your network, ensuring long-term consistency without manual effort.

Zero Setup. Full Focus.

Magnetic Shading Hood

Snap On and Focus Instantly

This included one-piece magnetic shading hood snaps into place instantly—no tools or assembly required. By blocking ambient light and glare, it allows you to see your work accurately and create without distractions, helping designers stay fully focused.

Nano Matte Panel

No Reflections and Comfortable Eyes

BenQ’s Nano Matte Panel diffuses ambient light and reduces ambient glare, letting you work with less reflections and see your work clearly. Your eyes will stay comfortable during long design sessions.

Control Your Workflow Instantly

BenQ Display Pilot 2

BenQ’s free Display Pilot 2 software lets you organize key functions like ICCsync and Desktop Partition into streamlined workflows that adapt to your design needs in a faster, smoother, and more

flexible way.

Wireless Hotkey Puck

Hotkey Puck syncs with Display Pilot 2 for effortless monitor control. Three customizable keys provide instant access to Color Mode, Input, KVM, or app launch, while the rotation dial adjusts brightness, contrast, and volume—no menus needed. So you stay focused on work without distraction.

Less Clutter, More Control

All-in-One USB-C for Mac Compatibility

Transfer data and up to 96W power via one USB-C. Thunderbolt 3/4 works seamlessly with BenQ displays for a smooth workflow.

Reliable RJ45 Wired Connection

With RJ45, connect monitors for networked management, synced color settings, and scheduled auto-calibration to keep team-wide consistency.

Built-in KVM

Seamless Mac & PC Control

Onboard KVM for seamless Mac and PC control. Switch effortlessly using one keyboard and mouse, keeping your workflow smooth even during heavy rendering or design tasks.

Built-In Ergonomic Comfort

Adjust your monitor to the perfect angle with flexible tilt, swivel, and pivot control, with the built-in ergonomic stand. Whether designing or presenting to clients, you’ll always enjoy the right view to work comfortably and confidently.
