# Allied Telesis AT-AR4050S-30 hardware firewall 1.9 Gbit/s

Model: AT-AR4050S-30

Manufacturer: ALLIED TELESIS

EAN: 767035202433

Product Code: 1026999

## R21,221

The AR4050S UTM Firewall consolidates threat protection, application and web control capabilities into a single device - ensuring the security of business communications. Together with advanced routing and switching, the high-performance AR4050S integrated security platform is the ideal choice for Enterprise gateway applications.

The quad-core processor delivers powerful performance, significantly increasing throughput and enabling simultaneous packet inspection. It is optimized for single-pass low-latency traffic inspection. Security engines and threat signature databases from the industry’s leading vendors, with regular updates, provide up-to-the-minute protection against malware, viruses and other cyber-attacks.

- High availability bypass ports allow device redundancy with a single WAN link, reducing ongoing ISP fees. If the Master firewall loses power, traffic is automatically forwarded to the backup device.

- A USB interface supports 3G/4G connectivity, so data transfer can automatically switch to a mobile network when a primary WAN connection becomes unavailable.
- An SD card slot allows easy backup of important files.
- Autonomous Management Framework™ (AMF) compatibility automates device back-up for plug-and-play recovery.
