The Shuttle XPC Barebone SH570R6 shows how discreet a modern PC can look and at the same time how powerful it can be. Its black-brushed aluminium case has barely a volume of 14 litres, but packs everything you need for a high-performance workstation for example. This includes the power of 10th/11th gen. Intel Core processors ("Comet Lake-S" and "Rocket Lake-S"), a dual-slot graphics card, fast M.2 NVMe SSD drives, two 3.5'' hard drives in RAID and up to 128 GB of DDR4 memory, plus a Blu-ray drive. Even without a dedicated graphics card, up to three UHD displays are supported optionally.
