The iStorage datAshur BT is an ultra-secure, hardware encrypted USB 3.2 (Gen 1) flash drive. datAshur BT offers multi-factor smartphone (Android and iOS) secure wireless user-authentication via an encrypted Bluetooth® channel between the phone and the drive. Users can authenticate the datAshur BT Flash Drive by entering a 7-15-character password or simply use Biometric unlock (Face ID/Facial recognition, Touch ID/Fingerprint and IRIS Scanning) via their smartphone.

The datAshur BT encrypts data in real-time using a FIPS certified AES-XTS 256-bit hardware encryption algorithm. datAshur BT is OS/Host independent and works with all operating systems (Windows, Mac, Linux, Chrome, etc.) and devices supporting USB mass storage (computers, medical devices, TVs, drones, printers, scanners, etc.).

Secure your personal and business data to military standards to ensure compliance with stringent regulations and directives, such as GDPR, HIPAA, SOX etc to avoid painful and costly public disclosures of potential data leaks and loss of data.

OS & Host independent – works with any OS (Windows, Mac, Linux, Chrome, etc.), across any host and embedded systems (computers, medical devices, TVs, drones, printers, scanners, etc.) and Virtual Desktop Infrastructure (Citrix, VMware)
