presentation, or lecture will be an immersion of real-to-life color and extraordinary detail. The display is also equipped with Harman Kardon speakers, 4K/HDR/HLG support and Frame Interpolation technology for unsurpassable, immersive content delivery. At 25mm slim and lined with a 5mm frameless edge, the sleek display exudes sophistication and elegance in any modern setting. It offers flexibility and adaptability in design – with portrait and landscape installations to complement any space and scenario. The screens can be easily fused together to form an ultra-wide 32:9 video wall to deliver a seamless visual experience in epic proportions. The system control box can also be easily detached to blend into every design.

Ultra-Slim & Bezel-Free Design

With a huge 135” screen, larger than nine 46-inch LCD displays combined, this frameless display seamlessly delivers content without stitching bezels for a more immersive visual experience. Minimalistic and sleek, the 25mm-slim LED display exudes sophistication to complement any space and interior design.

True-to-Life Colors that Shine Bright

ViewSonic’s proprietary Cinema SuperColor+ Technology features a 120% Rec.709 wide color gamut that delivers lifelike colors. 600 nits high brightness with 8-level adjustments ensures incredible clarity anytime.

Powerful Sound for Big Pictures

Equipped with studio-grade Harman Kardon speakers, soak in high-fidelity audio that is tuned to pinpoint clarity no matter where you’re standing. The dual 20W sets of professional passive radiators, woofers, and tweeters deliver impressive sound for a true audiovisual feast.

Captivation in Every Pixel

Blessed with lightning-fast 4,440 Hz refresh rate, 1.5mm fine pixel pitch, and greater contrast ratio, enjoy slick moves and superbly crisp visuals on every video, presentation, or web conference. The display also comes with 4K and HDR/HLG support to display even more engaging visuals.

All-in-One Design without Complicated Setup

Free yourself from a complicated setup of power supplies, control systems, stitching machines, etc. - all you need to do is turn on the display.

Function Meets Design Excellence

- Detachable system control box

The system control box can be easily detached from the LED display for nearly 99% screen-to-body ratio that blends harmoniously to any decor.

Broaden Your Horizons Effortlessly

Stretch your display's real-estate by combining 2 LED displays to create an ultra-wide 32:9 video wall to create a visual experience of epic proportions. Free from complicated integration, you can complete the layouts in a short amount of installation time.

See a Different Perspective

The LED display can be installed vertically to best showcase your content. Whether it's a corporate message or an artwork, you can have it in portrait mode for art galleries, exhibition spaces, flagship stores, and lobbies.

Wireless Content Sharing Solution Across All Devices

The pre-installed ViewBoard® Cast enables content to be streamed from mobile devices onto the display over wireless, whether one-to-one or many-to-one.

Multitasking with Embedded System and Wi-Fi

With built-in OS and 2.4G/5G Hz Wi-Fi, users can easily work in a familiar PC environment for app installation, web browsing, multimedia play, wireless device connection, etc.

Cost-Effectively Receive AV Signal over Long Distance

The built-in HDBT receiver can receive uncompressed high definition 1080p multimedia content from up to 100m in distance through a cost-effective Cat.5e/6 single network cable. The display is also compatible with any certified HDBaseT transmitter, allowing for powerful content playback via AV signal.

Multiple Content in A Single Screen

Video conferences and online collaborations will now be more flexible and creative with the LED display's intuitive split screens. The display can support Picture-by-Picture (up to 4 different inputs) or Picture-in-Picture (a screen within another screen) scenarios in real-time*.
