Zebra VisibilityIQ Foresight

Model: VIQF-IOT-5Y

Manufacturer: ZEBRA

EAN:

Product Code: 1036975

R2,638

VisibilityIQ™ Foresight

VisibilityIQ Foresight gives you instant business intelligence about your zebra devices, when and how you need it. Empower data-driven decisions with predictive and actionable analytics across your entire device fleet, all from a single dashboard.

VisibilityIQ Foresight Gives You Instant Business Intelligence about Your Zebra Devices, When and How You Need It.

Without clear, comprehensive data that’s easy to access, you can’t see how your devices are performing, or decide what next steps to take to improve your operations. With VisibilityIQ Foresight, you enable a portfolio of tools to generate data-driven, actionable insights powered by Zebra Data Service. Get instant business intelligence about your Zebra devices and leverage the most from your assets, workers and daily tasks with VisibilityIQ Foresight. VisibilityIQ Foresight: combining visibility with intelligence.

Optimize device availability and uptime

VisibilityIQ Foresight optimizes device availability to enhance productivity – so your devices are working when and where you need them. Predictive analytics help you proactively address potential device issues before they impact your business, and uncover opportunities for cost-cutting, right-sizing inventory, load-balancing devices and reducing lost or stolen assets.

Leverage one, easy-to-manage view

VisibilityIQ Foresight intelligently combines data from unique Zebra data sources such as contracts, repair and case management systems with our own IoT agent and available MDMs. It translates the data into an easy-to-grasp, color-coded, one-view solution illustrating actionable insight and alerts on your fleet of mobile devices, no matter where they’re located across the operation.

Go beyond MDM tools to improve operations

MDM tools are transactional in nature and for IT experts only. VisibilityIQ Foresight is a complete solution designed around intelligent big data analytics. It quickly processes data points from millions of devices every day, and applies machine learning techniques to generate actionable insights with historical trends to run your business more efficiently.

Fleet Visibility At Your Fingertips

Prevent downtime and unexpected repair costs by gaining device health, utilization, and inventory data (insights) for your entire fleet, from printers, to mobile computers, to scanners. Keep operations running at their peak, enabling data driven decisions for your business.

Device Health

A Full View of Your Mobile Device Health

Maximize device uptime, ROI, and worker productivity by ensuring the health of your devices proactively. With VisibilityIQ Foresight, you can take the guesswork out of when to replace dead batteries, and whether your devices are up to date with the latest security.

Smart Battery Health
