

Kingston Technology FURY 16GB 7600MT/s DDR5 CL38 DIMM Renegade RGB XMP

Model: KF576C38RSA-16

Manufacturer: KINGSTON

EAN: 740617339376

Product Code: 1041235

R9,740

Up to 8800MT/s*

Kingston FURY™ Renegade DDR5 RGB memory enhances your machine’s performance and style. Ultra-fast memory offers 8000MT/s UDIMMs, 8800MT/s CUDIMMs and uses FURY CTRL™ software to provide 18 customisable RGB lighting effects. With our patented Infrared Sync Technology, enjoy some of the smoothest, most synchronised PC lighting out there. Kingston FURY Renegade DDR5 RGB memory is ideal to squeeze maximum performance from a PC without compromising reliability. Modules are Intel® XMP 3.0 Certified to make overclocking a breeze and come 100% factory tested

at the advertised speed.

Game in style with Kingston FURY™ Renegade DDR5 RGB** memory, designed for extreme performance on next-gen DDR5 platforms. Give your system the performance boost and flair needed to stay on top with UDIMM or CUDIMM module types for ultra-fast memory at up to 8000MT/s with UDIMMs and 8800MT/s* with CUDIMMs, while utilising FURY CTRL™, 18 customisable RGB lighting effects. Kingston FURY Renegade DDR5 RGB features sleek, newly designed black & silver or white & silver heat spreaders with dynamic light bars featuring 12 LEDs that utilise Kingston’s patented Infrared Sync Technology to provide smooth, synchronised RGB lighting effects that complement the look of the latest PC builds.

Whether you’re creating content, multi-tasking or pushing the limits to the extremes for your bleeding edge game title, Kingston FURY Renegade DDR5 RGB memory is the ideal choice for gamers, enthusiasts, content creators and extreme overclockers. 100% factory tested at speed and backed by a limited lifetime warranty and over 35 years of expertise, dependable Kingston FURY Renegade DDR5 RGB gives you the best of both worlds: extreme performance and maximum peace of mind.

Dynamic RGB lighting and aggressive heat spreader design

Bring your system to life with 18 preset RGB lighting** effects utilising Kingston FURY CTRL or the motherboard manufacturer’s RGB software with the sleek newly designed black and silver or white and silver aluminium heat spreaders with black PCB.

Patented Kingston FURY Infrared Sync Technology™

Ensure your RGB lighting effects stay in perfect lock-step with Kingston’s patented Infrared Sync Technology.

Engineered to maximise performance

With UDIMM speeds up to 8000MT/s and CUDIMM speed of 8800MT/s*, Kingston FURY Renegade DDR5 RGB features enhanced overclocking performance with improved stability at higher speeds for AI PC workloads and other rigorous computing demands.

Tap into extreme overclocking potential

DDR5 ushers in a whole new era of memory technology to make extreme overclocking a more stable option than previous generations. On-die ECC delivers more reliable DRAM components, an on-board PMIC balances power when and where it’s needed, and two independent 32-bit subchannels provide dramatic increases in data efficiency for multi-core processors.

Intel® XMP 3.0 certified

Intel Extreme Memory Profile technology makes overclocking a breeze with advanced pre-optimised factory timings, speeds and voltages for overclocking performance. Renegade DDR5 RGB features a programmable PMIC for XMP 3.0, supporting up to two customisable profiles to optimise your own unique timings, speeds and voltages saved directly to the DIMM.

Qualified by the world’s leading motherboard manufacturers***

Tested and trusted for your preferred motherboard so you can build with confidence.
