This DisplayPort KVM Switch enables users to switch between four desktops equipped with USB-A and DisplayPort. It facilitates sharing a 4K 60Hz DisplayPort monitor, a keyboard, mouse, two USB 5Gbps devices, a stereo audio output device, and four USB 2.0 devices.

High-Resolution 4K 60Hz Video

This KVM supports resolutions up to 4K 60Hz, making it ideal for applications such as CAD/CAM, video editing, and content creation. In addition, its support for High Dynamic Range (HDR) enhances contrast, brightness, color, and overall vibrancy.

Customizable Switching

This universal KVM switch offers hotkey and push-button switching. Hotkeys allow independent switching of audio and video, enabling audio playback from one computer while controlling another. An audible buzzer confirms hotkey inputs, and LEDs provide visual status feedback for the selected host.

Universal Compatibility

The TAA-compliant KVM Switch offers universal compatibility and works with all operating systems, including Windows, macOS, ChromeOS, and Linux. The KVM provides BIOS/UEFI control and is compatible with all hardware platforms, including Intel, AMD, and Apple Silicon (M1/M2/M3).

Reliable Performance

The rugged metal case helps prevent electromagnetic interference (EMI). 8kV Air/6kV Contact ESD protection enhances the reliability and longevity of the KVM. The included set of rubber feet protect the work surface from scratches and keep KVM in place during operation.

Rackmount your KVM switch

If you'd like to mount this KVM switch to your server rack, we offer a 1U Rackmount Bracket (sold separately) that turns this KVM into a rackmountable KVM.
