The power of two: Multi-Link Operation

Orbi WiFi 7 taps both 6 GHz and 5 GHz WiFi bands at once to avoid network traffic and keep you connected if you move out of range of one band. It also enables devices to simultaneously send and receive data across both WiFi bands, increasing throughput.

Outsmart WiFi interference: Preamble Puncturing

Did you know your neighbors' WiFi might be slowing your network down? With previous versions of WiFi, any channels with interference become unavailable. Orbi WiFi 7 includes smart interference management, greatly reducing network congestion.

Easy to set up, manage, and monitor

The Orbi app makes it easy to install your Orbi and get it up and running quickly. Easily manage and monitor your home network even when you are not at home. Orbi is compatible with any internet service provider.

More WiFi networks, more performance

Easily create up to 3 separate networks for WiFi 7 and smart home (IoT) devices to optimize overall network traffic and enhance security.

All-in-one security and privacy, made simple

With new privacy and security threats every day, what do you need to stay protected? NETGEAR ArmorTM makes it easy by bundling all the tools to help secure your devices, at home and on the go, for one low price. 30-day trial included.

Keep kids safe with Smart Parental Controls

Promote healthy Internet habits, foster responsibility and build trust with your kids with NETGEAR® Smart Parental ControlsTM. 30-day free trial included.
