

D-Link 5G Transit Router

Model: DTM-550-G

Manufacturer: D-LINK

EAN: 790069480706

Product Code: 1048199

R11,205

5G SA & NSA

Leverage flexible 4G/5G dual-mode compatibility to adapt seamlessly to diverse carrier networks.

Wi-Fi 6 AX1800

Enhanced service efficiency via high-speed Wi-Fi for seamless access for passenger and connected devices.

Dual-SIM Failover

Two SIM slots with failover redundancy for critical applications to ensure reliable cellular WAN connectivity and business continuity.

EN50155 / E-Mark Certified

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

shop.cssi.co.za | sales@cssi.co.za | +27 (11)541-9950

Compliant with EN50155 and E-Mark certifications to ensure the reliability and safety for the smart transportation.

GPS Location

Real-time tracking enables routing services to minimize travel time and optimize fleet efficiency.

Wide Voltage Input Range

Safely accepts power input from various on-board power sources for convenient installation.

Enhanced Passenger Wi-Fi and Real-Time Telematics

The DTM-550-G 5G Transit Gateway transforms public transport experiences by providing high-speed in-vehicle Wi-Fi and real-time content updates. Passengers can enjoy seamless internet access and receive instant updates on weather and advertisements directly on digital signage, enhancing satisfaction in intelligent public transportation.

Optimize Vehicle Operation with Location-Based Services

The DTM-550-G equips fleet vehicles with precise GPS location positioning, integrating seamlessly into customer's fleet management for real-time vehicle tracking, and optimizing route planning. This enhances operational visibility and efficiency and supports improved decision-making.

Robust Design with Vibration/Shock Resistance

Certified with EN50155 and E-Mark, the DTM-550-G design withstands vibrations, shocks, and extreme temperatures, ensuring data transmission stability even in moving vehicles. Ideal for demanding M2M applications in public transportation, it meets rigorous safety and regulatory standards for seamless automotive integration.
