PPDS Wave Creator

Content Management System for easy content scheduling and simple template creation

Introducing PPDS Wave Creator

Need more content control on your Philips professional display? Scheduling content and creating templates are made simple with our own PPDS Wave Creator application.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Fully integrated into the Wave ecosystem, Wave Creator is available on the PPDS ProStore for fully remote installation, sitting alongside premium applications from our development partners, offering different and unique applications, supporting a range of business needs.

A powerful application for creativity and inspiration

- Easy-to-use basic CMS. Create professional content using images, videos, text and more
- Text editor to easily change text in menus and signage quickly and efficiently
- Professional templates to inspire ideas and start working with immediately
- Simple to use drag and drop interface, with preloaded templates and integrated widgets
- Content scheduling allows you to blend different media over different times, days, or weeks
- Out-of-the-box experience, seamlessly integrates with Wave Controller claiming and display settings
- Managed maintenance means back-end servers, redundancies, and backups are all managed for you

Create content for your Philips signage displays

PPDS Wave Creator is integrated with Wave Controller, delivering basic content management features, including:

- Content scheduling
- Widgets for text, clock, image, video, YouTube, playlist, webpage, QR-code, playlist, API
- Text editor and templates
