HP Sure Click Enterprise Antivirus security 1 license(s) 2 year(s)

Model: U86PSZ

Manufacturer: HP INC.

EAN:

Product Code: 1049781

R2,157

Sure Click Enterprise uses hardware-enforced virtualization on endpoint devices to isolate risky activity that users perform every day, such as opening email attachments, browsing the web, and downloading files. Application isolation dramatically decreases the attack surfaces and helps contain threats online or offline inside secure containers. Each endpoint protected by Sure Click Enterprise performs threat analysis and reports indicators of compromise (IOC) and indicators of attack (IOA) to proactively protect your entire infrastructure from known and unknown threats. HP Security offers a variety of deployment options, including a quick time-to-value cloud-based model.

For organizations who choose cloud-based deployment, HP Security hosts and manages all customer Sure Controller instances 24/7/365 in AWS. This is an ideal deployment scenario for companies that wish to expedite deployment and adoption of virtualization-based security to achieve immediate
