R1,860

For clear, hands-free Push-to-Talk from task one to done

Purpose-built for retail associates on the store floor, Jabra Perform 10 Wired Push-to-Talk (PTT) Earpiece acts as a value-adding endpoint for PTT software from Zebra and Zello with In-Line Microphone.

Perform 10 works with PTT software to give associates a quick, easy, and reliable way to communicate, while staying heads-up, hands-free and focused on customers - from minute one of their shift.

Why add Perform 10 to your Push-to-Talk deployment?

Push-to-Talk apps from leading vendors like Zebra and Zello are powerful tools that simplify communication and improve associate productivity. But without a headset, PTT messages can be missed, overheard, or slower to act on.
That’s where Perform 10 comes in.

Plug in and hear every word

Even during peak trading hours, Perform 10’s high-performance microphone filters out store noise for clear, reliable communication across the floor. Audio plays directly in-ear to keep conversations private, while still allowing associates to stay aware of their surroundings - reducing repeats and customer disruption.

Plug in and be comfortable allshift long

We know that comfort is critical for adoption. That’s why Perform 10’s lightweight, discreet design is made to fit over 90% of ears. Its adjustable ear piece and curved ear hook means it will stay comfortable and in-place on either ear, while the in-line controller has a rotating clip that easily attaches to different uniforms.

Plug in and connect

Perform 10 is simple for associates to learn and use – no charging, no pairing, just USB-C plug-and-play. The adjustable ear piece and clip-on mic make it easy to get going, while the PTT button and volume controls are simple and accessible. This means less time training and fewer questions during rollout - so your teams can plug in and start communicating from minute one.

Plug in and keep going

Perform 10 might be small and light, but that doesn’t mean it’s fragile. It’s IP67-rated for dust and water resistance, drop tested to 1.8m, and reinforced to handle daily knocks, drops, and cleaning. It can be sanitized easily with 70% isopropyl alcohol wipes, so it keeps performing shift after shift with fewer replacements.

Plug in and expand your reach

Perform 10 is built for retail. But its core strengths also make it ideal for Push-to-Talk deployments in other sectors, from hospitality and healthcare to events and security. It delivers the same clarity, comfort, ease-of-use, and durability - wherever hands-free communication is essential.
