

Lenovo XClarity System management 1 license(s)

Model: 4L47A09132

Manufacturer: LENOVO

EAN:

Product Code: 1053073

R1,598

Centralizing and standardizing foundation data center processes enables administrators to deploy infrastructure and services faster and with less effort. XClarity Administrator seamlessly integrates into Lenovo ThinkSystem servers, networking, and storage to deliver software-defined agility through a streamlined user interface, from scripts, or from your own external IT applications.

Simplify

Administrators are able to find the right information and accomplish critical tasks faster through an uncluttered, centralized, dashboard-driven graphical user interface (GUI). Remove complexity from IT infrastructure with XClarity.

Accelerate

Automate and scale IT infrastructure deployment with XClarity to reduce time to market of new systems and free up valuable administrator time to focus on other high-value projects.

Integrate

Deploy and manage Lenovo infrastructure from your own IT applications by developing custom integration using XClarity's web-based REST APIs or XClarity Integrator software plugins for common IT applications.
