The Cisco Headset 720 Series features help improve your listening experience with everything you need in a business headset - at the office or at home. The lightweight on-ear design offers options of single or dual leather ear cups along with a padded headband that provides all day comfort. Wireless with Bluetooth that easily connects up to two devices simultaneously and receive device in-ear notifications, find the optimal microphone placement using its 276 degree rotation boom arm with flip-to-mute, and join meetings with ease using the all-new one button to join for Webex. This headset includes deep integrations with Cisco applications and select Cisco IP phones and devices, allowing for an intuitive user experience and intelligent IT headset management across the Cisco ecosystem.
