

CISCO Meraki MS130-48P Cloud Managed 48GE 740W PoE Switch

Model: MS130-48P

Manufacturer: CISCO

Product Code: 1053762

R103,855

The Cisco Meraki MS130-48P is a high-capacity, cloud-managed switch designed to streamline the deployment, management, and operation of networks. This switch features 48 RJ-45 ports with PoE+ support, enabling the connection and powering of a wide variety of devices, alongside 4 SFP ports for high-speed fiber connections. With a robust 104 Gbps switching capacity, it meets the demands of high-bandwidth applications, ensuring efficient data transmission across the network.

Designed for durability and reliability, the MS130-48P operates effectively in a wide range of environmental conditions, making it a versatile choice for various settings. Its comprehensive cloud management capabilities allow for easy setup and remote management, reducing the complexity of network administration. The generous 740 W PoE budget further enhances its utility by supporting numerous PoE+ devices, making it an ideal solution for businesses looking to optimize their network performance and scalability.
