

HATOR Skyfall 80 MAG ULTRA 8K keyboard Gaming USB QWERTY US English Black, White

Model: HTK1880

Manufacturer: HATOR

EAN: 8721325639646

Product Code: 1054110

R2,073

The keyboard is equipped with advanced HATOR Aurum Ice magnetic switches that deliver exceptionally fast and precise actuation while offering extensive fine-tuning options. With a wired connection supporting up to 8000 Hz polling rate, it ensures instant response with zero delay, while the refined noise and vibration isolation provides a smooth and satisfying typing experience.

HATOR Aurum Ice Magnetic Switches

Adjustable Actuation Distance

Individual adjustment of each key's actuation point for ultimate precision and personal gaming comfort.

Dynamic Key Stroke (DKS)

Up to four different actions on a single key — depending on the depth of press or release.

Press and Click (MT)

One key — two functions: a short tap triggers one action, while holding it activates another.

Toggle Switch (TGL)

Automatic press modes: continuous hold or cyclic repetition without additional input.

Snap Key

Smart dual-key logic — the system registers the last pressed key for faster reaction time.

Rapid Trigger: 0.01mm

Instant key reactivation with only 0.01 mm of movement.

Choose for yourself.

Three available form factors — 65% and 80% — let you pick exactly the keyboard size that fits your needs and style of use.

Gasket Mount Architecture

The construction with elastic gaskets between the plate and the case evenly distributes pressure during keystrokes. This reduces vibrations and makes typing sound softer and more pleasant. As a result, the keyboard delivers exceptional comfort and full immersion during work or gaming.

Lubricated Stabilizers

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

shop.cssi.co.za | sales@cssi.co.za | +27 (11)541-9950

Hand-finished POM stabilizers ensure smoothness, stability and a harmonious sound on large keys.

Next-Level Sound Insulation

A multilayer sound and vibration isolation system reduces unwanted noise and delivers a comfortable typing experience.

Hot-Swap Switches

Quick and easy switch replacement without soldering – customize the keyboard to your personal preference.

Maximum speed at your fingertips

8000Hz polling rate combined with a 64 000 Hz key scan rate.

No hardware limits — now everything depends solely on your reaction.

Double-Shot PBT Keycaps

Ergonomically sculpted keycaps with shine-through legends provide satisfying tactile feedback and long-lasting durability.

Multimedia control knob

Volume and mute settings are always at your fingertips — or assign any other function you like via the software.

Fully Customizable RGB Lighting

Adjust the lighting of every key with a palette of 16.8 million colors.

The side panels with 19 RGB zones can be synchronized with the main lighting or customized separately via software.

Full N-Key Rollover

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
