HATOR Aurum Mechanical Switches

Pre-lubricated switches provide light and precise actuation, unlocking a premium gaming experience.

Thanks to the carefully designed POM housing and stem, friction is minimized, delivering a characteristic deep and muted sound with every keystroke.

The integrated lens enhances illumination, making all key legends bright and even.

Gasket Mount Architecture

The construction with elastic gaskets between the plate and the case evenly distributes pressure during keystrokes. This reduces vibrations and makes typing sound softer and more pleasant. As a result, the keyboard delivers exceptional comfort and full immersion during work or gaming.

Lubricated Stabilizers

Hand-finished POM stabilizers ensure smoothness, stability and a harmonious sound on large keys.

Next-Level Sound Insulation

A multilayer sound and vibration isolation system reduces unwanted noise and delivers a comfortable typing experience.

Hot-Swap Switches

Quick and easy switch replacement without soldering – customize the keyboard to your personal preference.

Double-Shot PBT Keycaps

Ergonomically sculpted keycaps with shine-through legends provide satisfying tactile feedback and long-lasting durability.

Fully Customizable RGB Lighting

Adjust the lighting of every key with a palette of 16.8 million colors.
The side panels with 19 RGB zones can be synchronized with the main lighting or customized separately via software.

Full N-Key Rollover

No keystroke will be missed – absolute control during fast-paced gameplay.

Multimedia control knob

Volume and mute settings are always at your fingertips — or assign any other function you like via the software.

Customization Software

Take advantage of extensive options to tailor the keyboard to your needs using the dedicated software.
