Manufacturer: FORTINET

Product Code: 1055508

R49,123

The FortiGuard Operational Technology Security Service provides specialized intrusion prevention system (IPS) signatures to detect and block malicious traffic targeting applications and devices in manufacturing, plant, safety, and other operational technology (OT) environments. Combined with a FortiGate NGFW, malicious network traffic is blocked before causing harm by threat actors seeking to control or disrupt operations. In addition, the service can act as a virtual patch to provide immediate security protection until a vendor patch can be developed and deployed.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
