Huion Kamvas Pro 19 GT1902 graphics tablet

The Huion Kamvas Pro 19 is a professional 4K UHD (3840 × 2160) pen display that combines impressive image quality with portability and convenience. With an 18.4-inch screen and a thickness of just 21 mm, it weighs only 2 kg, so you can create wherever you want - in the studio, at a coffee shop or on the go. The IPS display with 220 nits brightness and 1000:1 contrast ratio guarantees a crystal-clear image, while 2nd Gen Low Sparkle AG Etched Glass technology eliminates reflections and eye fatigue, preserving the feel of drawing on real paper.

4K color fidelity

Kamvas Pro 19 delivers up to 99% sRGB, 96% Adobe RGB and 98% DCI-P3, capturing every detail and subtle shade of color. More than 1.07 billion colors (10-bit + FRC) and factory hardware calibration (ΔE < 1.5) guarantee excellent color accuracy. It's ideal for illustrators, graphic designers, designers and filmmakers who expect full compliance with professional standards.

Precision for writing and drawing

Huion's new PenTech 4.0 technology takes work comfort to the next level. It comes with two battery-free pens - the PW600 and PW600S - that respond with as little as 2g pressure and support up to 16,384 levels of sensitivity. Optimized tip pitch (0.35 mm), ±60° tilt support and ±0.3 mm accuracy ensure a natural flow of motion and full control over every stroke. A choice of standard or felt tips allows you to tailor the feel of your work to your preference.

Touch and gestures

Kamvas Pro 19 supports 10-point multi-touch (on Windows) for intuitive zooming, rotating and scrolling. Combining touch with Bluetooth keyboard and shortcut support allows you to organize an ergonomic workstation without unnecessary accessories and maintain full control over the creative process.

Ergonomic and durable design

The back panel is made of lightweight aluminum alloy, which gives the device an elegant look and increases its durability. The built-in 20° stand and compatibility with VESA 75×75 mm mounts allow you to adjust the working angle to suit your individual needs. The double-sided handles make it easy to carry, and the slim form factor blends in perfectly with any desk.

Full connectivity and power

The Blind-Mate's dual USB-C ports provide data and video transfer in a single cable, and support 65W PD power and 40W chargeback. A GaN power adapter and a set of cables are included, so you can easily connect your tablet to your laptop or desktop computer. Minimalist cabling ensures order and convenience.

Compatibility and software

Huion Kamvas Pro 19 works with Windows 10 or later, macOS 10.12 or later, Android 6.0+ (with USB 3.1 Gen 1 & DP 1.2) and Linux (Ubuntu 20.04 LTS). The tablet supports popular graphics programs such as Photoshop, Illustrator, After Effects, Blender, Clip Studio Paint and Krita, offering fully
