

Huion Kamvas Ink Digital Notebook 10 EB1011

Model: EB1011

Manufacturer: HUION

EAN: 6930444806071

Product Code: 1058066

R7,640

Huion Kamvas Ink 10 EB1011 Digital Notebook.

The Huion Ink EB1011 is an advanced e-notepad device that combines the functionality of a graphics tablet with the convenience of traditional paper. Equipped with a 10.3-inch E-Ink screen with a high resolution of 227 PPI, Android system, battery-free stylus with 4096 pressure levels and a capacious battery, it provides comfortable writing, reading and editing documents. With its compact design, lightweight body and security features such as a fingerprint reader, it is ideal for work, education and daily use alike.

Natural writing and reading experience like on paper

The device offers an authentic writing and reading experience thanks to its E-Ink Carta technology and anti-glare film with full lamination. The high-resolution 1404 × 1872 pixel (227 PPI) screen

provides a crisp and comfortable image without eye strain. The display supports a 16-degree grayscale for accurate reproduction of text, sketches and graphics, and its neutral color tone facilitates long-term use without eye fatigue. The use of capacitive and electromagnetic touch technology enables both intuitive finger operation and precise stylus typing, offering a comfortable and natural user experience.

Advanced stylus for casual work

The Huion IP151 digital stylus supports up to 4096 levels of pressure sensitivity and a tilt of up to ±45° for smooth and precise writing, sketching or marking. The pen's lack of charging and its magnetic attachment to the case add to the convenience of use, while additional editing features - such as brushes, erasers and image insertion - allow full personalization of content.

Performance and capacity to support productivity

The Huion Ink runs on a quad-core processor with Mali-G52 graphics chip and has 4GB of RAM and 64GB of internal memory, providing smooth application performance and space to store documents, e-books and notes. The built-in Android system allows intuitive operation and use of additional features such as Bluetooth, Wi-Fi, changing the screen orientation and displaying video on external devices. There are also two built-in stereo speakers (2 × 8Ω, 1 W) and a microphone, enhancing the device's capabilities when using multimedia, voice recordings or online lessons.

Data security first

With support for a fingerprint reader and the ability to encrypt files and protect individual notes with a password, your data remains protected from unauthorized access. This solution will be especially appreciated by users working with confidential materials.

Ready to perform in all conditions

At 5.5 mm thick and 440 g in weight, the device is extremely portable. Its compact A5 format (237 × 186 mm) makes it fit easily into a bag or backpack, and the included case with magnetic closure not only protects the screen, but also adds to the device's elegant appearance. Thanks to the Hall sensor, the device automatically responds to the opening and closing of the cover, which translates

into more convenient and energy-efficient use.

A battery that keeps up with you

Equipped with a 4650 mAh battery, Huion Ink offers up to 20 hours of writing and up to 33 hours of reading. In standby mode, the device lasts up to a month, and it takes about 4 hours to fully charge, so you can count on its reliability throughout the day.

Multiple functions in one device

With split-screen mode, you can view documents and take notes at the same time. The OCR function allows you to convert handwriting into editable text, and mirroring support allows you to present content on a larger screen. Graphics tablet mode makes Huion Ink an ideal tool for creatives, teachers and students.
