

HPE ProLiant Compute DL380 Gen12 12LFF NC CTO Server

Model: P73284-B21

Manufacturer: HEWLETT PACKARD ENTERPRISE

EAN: 190017734668

Product Code: 1058217

R170,161

The HPE ProLiant DL380 Gen12 Network Choice is an adaptable rack-mountable server designed for enterprise-level scalability. With support for up to 12 hot-swap drive bays, it enables seamless storage upgrades and maintenance without downtime. The system is configured to accommodate dual processors, with a memory capacity of up to 32 DIMM slots, providing flexibility for various workload demands. Designed for performance, this server features an Integrated Lights-Out 7 management controller for efficient remote management. It adheres to multiple compliance standards, ensuring a secure and efficient operating environment. Operating with a minimum temperature of 10°C and a maximum of 35°C, this server can function in a wide range of environmental conditions while maintaining low sound emissions at 48 dBA. The dual power supply system is hot-plug capable, ensuring that power management remains uninterrupted during maintenance.
