# ONIKUMA DM02 gaming mouse (black)

Model: DM02 Black

Manufacturer: ONIKUMA

EAN: 6972470564501

Product Code: 1059132

## R1,064

### ONIKUMA DM02 gaming mouse (black)

The ONIKUMA DM02 is a lightweight gaming mouse designed for gamers who need maximum precision and fast response. Its open design, six DPI levels and the ability to use three connectivity modes allow it to adapt to any style of gaming. The device is also distinguished by colorful RGB backlighting, which gives it a modern touch and is eye-catching. Complete your gaming setup with a mouse that will make your gaming experience even more enjoyable!

### Lightweight, open design

The DM02 mouse uses an open design that reduces its weight and allows air to flow freely. This makes the device very lightweight, while guaranteeing a stable grip - even during intense gameplay.

### Six RGB backlighting modes

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. You can choose from up to six RGB lighting effects, so you can match the look of the mouse to the rest of the equipment on your gaming stand. Each mode is designed to visually distinguish the device and emphasize the atmosphere of the gaming station. What's more, the open design makes the backlighting easily visible from both the side and the top.

## Three connectivity modes

The DM02 can be connected in three ways: wirelessly in the 2.4 GHz band or via Bluetooth, as well as via a USB cable. Players can quickly switch between the two depending on their device or current needs. Choose the option that best suits your hardware and gameplay style - with ONIKUMA you don't have to limit yourself.

## Six DPI levels to choose from

The mouse lets you choose from six DPI settings: 800, 1200, 2400, 3600, 6400 and 12800, allowing you to match speeds and cursor precision to different game genres. Lower values work well for titles that require accurate aiming, while higher values allow lightning-fast movements during dynamic gameplay.

## 1000 Hz reporting frequency

The 1000 Hz reporting frequency ensures fast and stable transmission of mouse movements to the computer. Every action is recorded with high accuracy, reducing lag and keeping things running smoothly even during the most intense moments of gameplay. This gives you a greater sense of control and the responsiveness you need in games where responsiveness matters.

## Included

- Mouse
- 2.4 GHz USB receiver
- USB-A to USB-C cable
- User manual
