HOTWAV TAB R9 Pro tablet (black)

The HOTWAV TAB R9 Pro tablet is a device that will keep up with you wherever ordinary tablets cannot. It is resistant to water, dust, shocks, and extreme conditions. The high-capacity battery with power bank function gives you the freedom to work for hours without having to search for a power outlet, while the smooth Android system, powerful processor, and expanded memory ensure that apps and programs run without interruption. The large 2K screen and high-resolution camera set make both work and entertainment more convenient than ever before. The icing on the cake is the built-in powerful camping lamp, which makes the tablet a reliable companion for night trips, field work, and emergency situations.

Long days of operation on a single charge

At the heart of the HOTWAV R9 Pro is a 20080 mAh battery. Such a large battery translates into an impressively long operating time - over 120 days in standby mode, up to 35 hours of continuous

video playback, about 80 hours of music listening through the built-in speaker, and up to 28 hours of gaming. This means you can take your tablet on a long trip, to work in the field or to the mountains without nervously searching for power outlets. The device supports 20W fast charging, so recharging is quick and easy.

Ready for field work

The tablet was designed for people who work and relax in places where ordinary electronics quickly give up. It is equipment for special tasks – with full IP68 and IP69K durability certifications, meeting the MIL-STD-810H military standard. It is resistant to dust, mud, dirt, and high-pressure water jets, as well as shocks and extreme temperatures. It can withstand drops from heights of up to 1.2 meters, making it ideal for use on construction sites, in workshops, in the field, and when camping. For an even more secure grip, you can use the detachable strap on the rear panel, which makes it easier to work with gloves and while moving around.

Tablet and power bank in one device

The HOTWAV TAB R9 Pro runs for a long time on its own battery, but it can also power other devices. The 10W reverse charging function, implemented by OTG, allows you to use the tablet as a power bank. With it, you can charge your smartphone, drone, Bluetooth speaker, or other small accessories when you are in a place where access to electricity is limited. It is a practical solution for people who want to have one reliable source of energy during trips, field work, or long days on the construction site.

Octa-core processor and Android system

The Unisoc T606 octa-core processor is responsible for the tablet's responsiveness and stable performance. Combined with Android 14, it ensures smooth application operation, a clear interface, and advanced security features. The standard RAM is 6 GB, but thanks to the virtual expansion feature, you can add another 14 GB, reaching up to 20 GB of dynamic RAM. This allows you to conveniently use multiple applications at the same time, switch between them, and run more demanding programs without annoying slowdowns.

Plenty of space for your files

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The tablet is equipped with 256 GB of internal ROM memory, which gives you plenty of space for documents, photos, videos, offline maps, and applications right out of the box. However, if you need even more space, you can expand the memory with a TF card up to 2 TB. This makes the HOTWAV TAB R9 Pro a mobile data storage device, ideal for people who work with large files, TV series and movie lovers, and users who want to have a complete set of materials with them without having to constantly connect to the cloud.

Wide and clear display

The R9 Pro offers an 11-inch, ultra-large 2K display that provides an immersive visual experience when watching movies, browsing maps, or viewing photos. The large diagonal makes it easy to work on a split screen, edit files, and use office applications, while the high image detail makes text legible and graphics and photos look sharp and clear. It's a combination that will be appreciated by both professionals and those looking for a mobile entertainment center.

A photographic kit for special tasks

The HOTWAV TAB R9 Pro tablet is equipped with a dual rear camera system, with the main camera offering 64 MP resolution and the accompanying additional module offering 16 MP. This set allows you to take detailed documentary photos on a construction site, in a workshop, or in the field, as well as capture important moments from trips and expeditions. On the front, you will find a 16 MP camera, which ensures high-quality selfies and a clear image during video conferences, online meetings, or conversations with your team from anywhere in the world.

Built-in camping lamp

One of the most unique features of the HOTWAV R9 Pro is its very bright 350-lumen camping lamp, built with as many as 246 LED lights. This makes the tablet a tool for work and entertainment, as well as a reliable source of light. It will prove itself when camping, during night hikes, in the workshop, and also in emergency situations when there is a power outage. Long battery life combined with a powerful flashlight means you can rely on this device even in the most demanding conditions.

Included in the set
