Onikuma CW917 Wired Gaming Mouse (Black)

The Onikuma CW917 is a wired gaming mouse that prioritizes simplicity and precise control during gameplay. It offers four DPI levels (1200–3600), allowing you to quickly adjust the sensitivity to suit any situation—from relaxed work to fast-paced gaming. Changing settings is done with a single button, without installing any additional software.

Comfort During Longer Sessions

The ergonomic shape, inspired by gaming design, fits comfortably in your hand and supports a natural finger placement. This results in less fatigue during extended gaming sessions. The surface is pleasant to the touch, which improves grip confidence. In practice, this means greater control and comfort even after several hours of use.

Functional buttons

The CW917 model offers six programmable buttons that make it easy to react quickly in-game. You have standard buttons, a scroll wheel, and side buttons for navigation at your disposal. An additional DPI button lets you instantly change sensitivity without interrupting gameplay. This ensures that everything you need is right at your fingertips.

Stability and durability for everyday use

The non-slip base improves control over mouse movement and prevents unintended shifts. The sturdy construction is designed for heavy use, which translates to a longer lifespan for the buttons. The wired connection eliminates lag and ensures consistent responsiveness.

Wide compatibility and quick setup

The mouse works in plug-and-play mode, so just connect it to your computer and it's ready to use right away. It supports popular operating systems, including Windows and macOS. It requires no additional drivers, making setup a breeze.

Backlighting that sets the mood

The mouse features RGB backlighting with 7 modes, giving your setup a more gaming-oriented look. The colors are vivid and clearly visible even in low light. This makes it easier to match the look of the mouse to the rest of your setup.
