Model: 381-03628

Manufacturer: MICROSOFT

Product Code: 1061859

R2,171

Microsoft Exchange Server Standard CAL provides a feature-rich messaging environment for core users, including rich-client email, calendaring, mobile device access, and anti-spam functionality. A rich Outlook-like experience from any Internet connected computer with a supported browser provides encrypted access to the inbox, powerful search, and the ability to view different types of attachments. Exchange Server ActiveSync technology delivers an improved Outlook e-mail and calendaring experience on mobile devices, while offering enhanced device and security policy control. Organization-wide policy management enables easier and faster auditing, cross-mailbox search, mail flow rules for enforcing encryption and rights management, and routing policies. Built-in defenses against spam and phishing e-mail as well as new antivirus filtering and scanning capabilities provide comprehensive protection.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
