This masked swordsman appears in several games featuring Kirby as Kirby's mysterious rival. His giant cape transforms into wings, giving him the power of flight, and he captains a giant battleship called the Halberd. In the Kirby™ Air Riders game, Meta Knight and others can ride machines like the Shadow Star: an Air Ride Machine that soars on sleek and shadowy wings while airborne and that can cause major damage with its attacks with even a single hit.

Place this Meta Knight amiibo™ figure onto the Shadow Star amiibo to create a Rider & Air Ride Machine combo in the Kirby™ Air Riders game. Tap the amiibo to create a Figure Player (FP) that will gain FP levels and machine proficiency as you train it in the game. If you have other Air Ride Machine amiibo, you can place the Meta Knight amiibo onto them to create new Rider & Air Machine combos. Meta Knight will retain FP levels when tapped with a different machine.
