Model: NPO-1455

Manufacturer: NATEC

EAN: 5901969420326

Product Code: 1063822

R861

Small computer mouse pads can be annoying - curved corners, jagged edges... This is a thing of the past! Natec Maths is a very large pad with the dimensions of 800 x 400mm, which will fit not only the mouse, but also a keyboard. Thanks to its large surface, the pad protects the desk top against damage and due to its excellent quality, it will serve the user for a long time.

The main feature of Natec Maths is the unique design imitating a blackboard with mathematical formulas including geometry, trigonometry, algebra and basic formulas of series and functions. The design was enhanced by geometric shapes and a large humorous slogan in the middle "Keep Calm and Do Math". Thanks to this, the pad not only facilitates the use of the mouse, but also helps during work, play or study being great help for every student. Unobtrusive colors make the pad an interesting complement to the interior design.

The external waterproof layer of the pad was covered with a fabric providing the right precision in tracking mouse movements while reducing its friction. The bottom layer is covered with rubber, the task of which is to guarantee adhesion of the product. In addition, the low profile increases the comfort of using the mouse, but also helps during work, study or play.
