Manufacturer: EJEAS

EAN: 5905156101944

Product Code: 1063984

R1,313

EJEAS E1+ Bluetooth Headset for Helmets

Freedom of conversation, clear sound, and stable connectivity are the foundation of an enjoyable motorcycle ride. The EJEAS E1+ combines an advanced Qualcomm Bluetooth chip with high-end audio processing and CVC noise reduction technology to ensure clear communication even in demanding road conditions. Long battery life, support for two phones simultaneously, and integration with the Q7 intercom make it a versatile solution for motorcyclists traveling solo or in pairs. Intuitive operation, automatic call answering, and voice assistant support allow you to focus entirely on riding.

Stable wireless connectivity

The use of the Qualcomm Bluetooth chip translates into fast and stable data transfer and greater range. The connection to your smartphone is maintained at a distance of up to 10 meters, ensuring freedom of movement and reliability while riding. Advanced multi-connection support allows you to pair two smartphones simultaneously or one phone and another Bluetooth device, so you can flexibly manage your communications and multimedia without having to re-pair.

Clear sound and noise reduction

A professional Hi-Fi speaker supported by a powerful audio processing system with dynamic signal processing is responsible for the listening quality. As a result, the sound is clearer, more detailed, and stable for both calls and music playback. CVC technology reduces echo and ambient noise, significantly improving call clarity even at high speeds. An additional 3D stereo effect enhances the spatial experience, increasing listening comfort while wearing the headset.

Long battery life and independent speaker power supply

Each of the two speaker modules is equipped with a 360 mAh battery, providing up to 19 hours of talk or music playback and up to 200 hours of standby time. A full charge takes about 2.5 hours, and an LED indicates the status of the process – it lights up red during charging and turns off when charging is complete. These parameters make the set ideal for long trips and journeys without the need for frequent recharging.

Support for two phones and smart features

The ability to connect two smartphones simultaneously allows you to receive calls from different numbers, switch music, adjust the volume, and use the automatic call answering feature. Just hold down the phone button for a second to activate the voice assistant and communicate with it in real time. This allows you to navigate, control multimedia, or make calls without taking your hands off the steering wheel.

Multitasking and compatibility

The kit can work as an intercom when paired with the Q7 model, which it connects to automatically when entering pairing mode. The conversation range is 10 to 20 meters, making it ideal for

motorcycle drivers and passengers or partners traveling close to each other. Constant communication increases safety and driving comfort by enabling the transfer of information in real time while traveling.

App and easy call management

The dedicated EJEAS app, available for iOS and Android, allows you to create user groups and manage calls easily. Quick setup reduces preparation time and makes it easy to stay in touch with your travel companions. This allows you to fully focus on the route and shared experiences.

Included

- headset
- USB-C cable
- user manual

Manufacturer	EJEAS
Model	E1+
Bluetooth connection	Yes
Bluetooth connection range	up to 10 m
