

Graphic Tablet Huion H1060P

Model: H1060P

Manufacturer: HUION

EAN: 6930444800697

Product Code: 1065172

R2,378

Graphic Tablet Huion H1060P

The Huion H1060P graphics tablet offers a working space of 254 x 158.8 mm and a resolution of 5080 LPI, allowing for convenient and precise graphics creation. The device supports 8192 pressure levels and detects the tilt of the stylus up to ±60°, allowing you to vary lines according to the strength and angle of the stroke. With a reporting frequency of more than 220 PPS and motion detection from as little as 10 mm away. There are 12 programmable physical and 16 touch-sensitive buttons on the chassis, which greatly facilitate daily work. The device works with Windows, macOS, Android and Linux and uses a micro USB port connection. The included PW100 stylus does not require charging.

Precise line control and detail reproduction

The device captures as many as 8192 levels of pressure, making it possible to accurately vary the thickness and intensity of lines depending on the amount of pressure applied by the stylus. The input resolution of 5080 LPI provides the detail that is important when working on illustrations, technical

designs or retouching. The movement of the stylus is detected from a distance of as little as 10 mm, and accuracy reaches ±0.3 mm. As a result, the tablet responds precisely regardless of the creator's working style.

Responsiveness that keeps up with every movement

With a reporting rate of more than 220 PPS, every stroke of the stylus is instantly transferred to the screen. Even high-speed sketches and dynamic lines are captured without delay, keeping your work flowing and avoiding interruptions in your movement. This feature is especially important for conceptual work and when creating storyboards or animations.

Tilt recognition

Huion H1060P supports the tilt of the stylus up to ±60°, allowing you to achieve a natural stroke effect - similar to that of a traditional pencil or brush. The solution used works well for shading and working with textures, among other things. You don't need to adjust the settings in the graphics program - just change the hand position.

Ready to work at any time

The tablet comes with the PW100 stylus, which works on the basis of electromagnetic resonance technology and does not require batteries or charging. The rubber coating improves grip and increases comfort, and two function buttons allow quick access to selected tools. The stylus can be stored in the PH03 cradle included in the kit, which also serves as a tool for changing tips.

Quick access to favorite functions

The Huion H1060P case is equipped with 12 physical and 16 touch programmable buttons. You can assign your most frequently used functions or keyboard shortcuts to them. Reducing the number of repetitions and manual switching of tools in the program allows you to focus on the creation process itself and increases the fluidity of your work.

Great compatibility

The tablet works with Windows 7 or later, macOS from version 10.12, Android 6.0 and above, and Linux. This means it can be used with most computers and smartphones on the market. The Huion H1060P also supports popular graphics programs such as Photoshop, Illustrator, SAI, Painter, Krita, GIMP and Clip Studio.

Included:

- Graphics tablet
- Stylus pen
- Micro USB cable
- Stylus pen holder
- Spare tip x8
- User manual

Manufacturer	Huion
Model	H1060P
Dimensions	360 x 240 x 10 mm
Work surface	254 x 158.8 mm
Weight	770 g
Touch function	-
Interface	Micro USB
Stylus pen model	PW100
Technology	without battery, EMR
Resolution	5080 LPI
Pressure sensitivity	8192 levels
Maximum tilt	±60°
Detection height	>10 mm
Reading speed	>220PPS
Accuracy	+0.3 mm
Keys	12 programmable Press Keys, 16 programmable Soft Keys
