Huion Inspiroy 2 M graphics tablet

The HUION Inspiroy 2M is a graphics tablet designed with the user's comfort in mind - whether a beginner or a more advanced user. It has gained new, better-feeling buttons, which, thanks to their clear separation from the work surface (they are 2 mm higher) and special tabs, allow easier operation without looking. In addition, it is equipped with a practical Scroller slider and programmable keys.

New stylus, more comfort

A new, thinner PW110 stylus is included - battery-free, with EMR technology. It has an extended silicone grip, and clever button placement prevents accidental pressing while drawing. This makes longer work more comfortable and the hand less tired. The stylus offers up to 8192 levels of pressure sensitivity and great precision, and it comes with an ergonomic stylus holder included - everything you need for stable drawing.

One button - three functions

The HUION Inspiroy 2M introduces for the first time so-called Group Keys, which allow you to assign as many as three different functions to a single button. This allows the number of available shortcuts to increase from 8 to as many as 24, making it much easier to work in various graphics applications and speeding up repetitive tasks. Each button can be freely configured in the controller, and a special Press Keys View allows you to quickly see what functions have been assigned - without having to memorize them all.

Drawing like on real paper

The tablet's working surface has been noticeably improved over previous models - the panel's friction has been increased by 20%, so drawing resembles working on paper. The matte texture and eye-pleasing colors make it easier to focus on your work, even during long creative sessions.

Draw wherever you want - including on your smartphone

Inspiroy 2M works not only with computers - it also works seamlessly with Android and HarmonyOS phones and tablets. This means you can connect your tablet directly to your mobile device and draw anywhere. In addition, the compact size and low weight make it easy to store and transport.

Tailored for right- and left-handed users

HUION has made sure that the tablet is convenient for everyone. The USB-C port is placed on the left side, and the layout of the buttons and slider is symmetrical. So you can easily rotate the device 180° and adjust it to your dominant hand in the settings. It also supports 90° rotation, which will be appreciated by those who use monitors in portrait orientation.
