Huion Kamvas 24 Plus graphics tablet

Large, precise and made for ambitious projects - Kamvas 24 Plus is a graphics tablet that meets the expectations of professionals. The 23.8-inch screen with 2.5K resolution, quantum dot technology and excellent color reproduction ensure a comfortable working experience for even the most demanding illustrations or conceptual designs. Add to that full lamination, a natural drawing experience and broad compatibility, and you have a tool ready for any challenge.

More space - more control

Kamvas 24 Plus is equipped with a 23.8-inch screen with a resolution of 2560 x 1440 px (QHD), which allows you to work freely on a large canvas without the need to constantly zoom and pan the frame. Every detail of your work will be perfectly visible, giving you a better overview of the entire composition and more control over the final result.

Vibrant colors

The use of quantum dot technology has made it possible to expand the color palette up to 140% sRGB, which translates into intense, vivid and very realistic colors. A depth of 16.7 million colors (8-bit) and a contrast ratio of 1200:1 further emphasize tonal transitions, shadows and lights. All this makes the image on the Kamvas 24 Plus screen look simply sensational - no matter what style you are creating.

Full comfort for your eyes

Quantum dot isn't just about colors - it's also about better eye protection. The technology effectively reduces harmful blue light emissions, and the matte glass with anti-glare finish reduces reflections. So you can work longer and more comfortably, even in bright light.

Visibility from every angle

The Kamvas 24 Plus screen offers a 178° viewing angle, allowing you to maintain color and brightness consistency regardless of position - ideal if you work in a team or like to reposition your monitor.

Feeling of natural ryskin

With a fully laminated screen with an anti-glare surface, you get a realistic paper-like working experience. The lack of air space minimizes parallax, and the cursor follows the stylus tip exactly - with no lag or misalignment.

Precision stylus

You'll find the PW517 digital stylus, which is based on PenTech 3.0 technology. It's lightweight, convenient, works without a battery and doesn't require charging. It offers 8192 pressure levels, ±60° tilt recognition, 5080 LPI resolution and a response speed of >220 PPS - giving you full control over line, shading and texture. Plus, a silicone grip and two programmable buttons provide convenience and faster tool operation.

Connections without limits

Kamvas 24 Plus is equipped with two USB-C ports - one for connection via a 3-in-1 (HDMI) cable, the other for connection via a full-function USB-C to USB-C (DP) cable. In addition, you'll find a USB-A port to connect accessories such as a keyboard, flash drive or controller. So you can easily connect your tablet to a computer, laptop or even an Android phone - provided it supports the DP 1.2 standard and desktop mode.

Ergonomics first

The tablet comes with an adjustable stand that allows you to angle the screen from 20° to 80°. This allows you to choose the perfect position for long working hours, without straining your neck or wrists. And if you want to increase your productivity - the tablet works with the optional KD100 mini controller, which can be purchased separately.

Compatibility? No problem.

Kamvas 24 Plus works with Windows 7 and later, macOS 10.12+, Linux and Android (USB 3.1 + DP1.2). It supports all popular graphics programs such as Photoshop, Illustrator, Clip Studio Paint, CorelDRAW, SAI, Krita and many others, allowing you to work in your favorite environment.

Included

- graphics tablet x 1
- battery-free stylus x 1
- stylus holder x 1
- replaceable cartridges (inside the stylus holder) x 10
- 3-in-1 cable x 1
- power cable x 1
- power adapter x 1
- quick start guide x 1
- cleaning cloth x 1

Manufacturer	Huion
Model	GS2402
Color	dark gray
Dimension	604.2 x 358 x 21~28.3 mm (without stand)
Working area	526.85 x 296.35 mm
Net weight	5.6 kg (with stand)
Touch	-
Stand	Adjustable stand 20°~80°
Video interface	USB-C, fully functional USB-C
Input voltage	AC 100-240V, 50/60Hz
Output voltage	19V 3A
Power consumption	≤20W
Power consumption in standby mode	≤0,3 W
Operating temperature and humidity	0-40°C 20-80%
Storage temperature and humidity	-20°C~60°C, 10-90%
Compatible with operating system	Windows 7 or later, macOS 10.12 or later, Android (USB3.1 DP1.2 or later), Linux

Screen

Resolution	2560 x 1440 (16:9) QHD
LCD type	IPS
AG glass	Etched anti-glare glass
Full lamination	Full lamination
Contrast ratio	1200:1
Brightness	220 cd/m2 (max)
