R3,814

GARRETT CS3 Z-LYNK Wireless Headphones

The GARRETT CS3 Z-LYNK wireless headphones take comfort to a whole new level when working with a metal detector, eliminating the limitations of traditional wires and giving you complete freedom of movement. The lightweight design and comfortable fit allow you to focus solely on the signals that matter, while the high-quality sound lets you pick up even the subtlest changes in the ground. Up to 30 hours of battery life on a single charge ensures long sessions without interruptions, and intuitive operation means the equipment is ready to go in just a few moments. This solution is designed for users who expect reliability, comfort, and precision in every detail.

Wireless technology that makes a difference

The built-in Z-Lynk receiver allows for instant pairing of the headphones with compatible Garrett detectors equipped with this technology, such as the Vortex, AT Max, ACE Apex, Axiom, Axiom Lite, or Pro-Pointer AT Z-Lynk. The connection process is smooth and hassle-free, so you can get right to

work. What’s more, the headphones can also be used with other detectors by connecting the optional Z-Link WT-1 transmitter, which significantly increases their versatility.

Clear and precise sound

The use of high-quality drivers guarantees clear, detailed, high-fidelity sound that helps you better interpret signals from the detector. The volume control allows you to adjust the sound level to your preferences and environmental conditions, making it easier to pick up even weaker signals. Additionally, the soft, padded ear cups effectively block out external noise, allowing you to focus solely on what matters most.

Stable, interference-free connection

The headphones operate in the 2.4 GHz band using frequency-hopping technology, which eliminates the risk of interference with other wireless devices. This ensures stable, smooth performance without delays or signal loss, even in challenging terrain.

Comfort tailored to you

The design is built for long-term use. Their lightweight housing and ergonomic fit ensure the headphones sit securely on your head and remain comfortable even during hours-long searches. The adjustable headband allows for a custom fit, and the soft ear cushions enhance comfort. The IP52 rating ensures resistance to light rain and everyday outdoor conditions; however, please note that the design is not intended for complete submersion in water.

Ready to use right out of the box

The set includes the CS-3 headphones and a USB charging cable, so you can quickly get the equipment ready for action. Long battery life on a single charge (30 hours) and convenient charging ensure the headphones are always ready whenever the opportunity for new discoveries arises.

Manufacturer	GARRETT
Model	CS3
Audio latency	17 milliseconds (6 times faster than Bluetooth)
Frequency response	30–18,000 Hz
Operating frequency	2.4 GHz band with frequency hopping to prevent interference
Auto-off	after 60 minutes of inactivity
Environmental resistance	IP52 (resistant to light rain)
Battery life	up to 30 hours
Charging time	5 hours
Weight	approx. 0.153 kg
