HP EliteBook X Flip G2i Notebook Next Gen Ai is a convertible 14-inch laptop designed for professionals who need flexible productivity and built-in AI capabilities. The 360° flip design adapts between laptop and tablet modes to support presentations, note taking, and on-the-go collaboration, while a 14-inch widescreen display helps deliver clear visuals for daily work.

This notebook emphasizes secure, responsive computing with an Intel Core Ultra 7 processor, LPDDR5X memory, and an integrated Neural Processing Unit that accelerates AI tasks for smoother Copilot+ PC experiences. Collaboration features include Poly Studio audio, AI noise reduction for cleaner calls, multiple USB-C and Thunderbolt 4 ports with Power Delivery for fast connectivity, and a spill-resistant keyboard with a dedicated Copilot key for quick access to assistant features. Built-in security and durability features such as secured-core PC, HP DriveLock, MIL-STD-810H testing, and a chassis intrusion sensor help protect data and hardware in everyday use.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
