TIMEKETTLE X1 Meeting Translator

TIMEKETTLE X1 Meeting is an advanced AI translator designed for business meetings, conferences, training sessions, and international communication. It supports 52 languages and 106 accents, enabling natural, real-time conversations among up to 60 participants simultaneously. Thanks to the Babel OS system, which is based on a large AI language model, translations take into account the context of what is being said and industry-specific terminology, while 5 dedicated operating modes, support for remote participants without an app, and bone conduction technology ensure comfortable communication even in challenging conditions.

Natural Communication During Multi-Person Meetings

X1 Meeting was designed with real-life group meetings in mind, where multiple participants can actively take part in the discussion without having to wait for their turn. Translation takes place simultaneously, keeping the conversation flowing smoothly and making it feel just like

communication in a single language. Joining a meeting is quick and convenient—simply scan a QR code or use a dedicated link to start collaborating with people in different locations within seconds.

AI-powered intelligent translation

At the heart of the device is the Babel OS system, which uses an advanced AI language model that analyzes the full context of what is said and understands the natural flow of conversation. The technology automatically corrects errors, interprets the meaning of sentences, and adapts translations to industry-specific terminology. As a result, messages sound more natural and precise than with traditional word-for-word translations. An additional advantage is free OTA updates, which continuously enhance the device’s capabilities and expand its functionality.

Five operating modes for various business scenarios

TIMEKETTLE X1 Meeting offers five specialized translation modes that allow you to tailor the device’s operation to a specific situation. The multi-person translation mode is ideal for conferences and board meetings, while the two-way mode facilitates one-on-one conversations and negotiations. Users also have access to a webinar listening mode, on-the-go translation during field visits, and support for phone calls and video conferences. Such a wide range of applications means that a single device can support communication across many areas of business activity.

Hybrid Meetings Without Limits

The device allows for the convenient organization of hybrid meetings without the need for additional specialized equipment. Remote participants can use their own smartphones, tablets, or computers and receive live translations via a dedicated link. This solution significantly simplifies the conduct of presentations, training sessions, project meetings, and discussions with clients and business partners from various countries, ensuring that all participants have equal access to information regardless of their location.

Precision and Efficient Design

The included headphones use bone conduction technology, which allows the microphone to focus primarily on the user’s voice, effectively reducing the impact of ambient noise. This solution

increases translation accuracy by 30% compared to the previous generation of devices at noise levels up to 80 dB, improves text recognition efficiency by 7.5%, and nearly completely eliminates crosstalk between speakers. The device is powered by a 4-core ARM processor manufactured using 12 nm technology, supported by 3 GB of RAM and 32 GB of internal storage. An additional advantage is the free OTA updates, which continuously expand the device’s capabilities by introducing new languages and system improvements.

Included in the box

- X1 Meeting main unit x1
- Earbuds (left and right) x1
- USB-C data cable x1
- Ear tips (3 sets) x1
- Ear hooks x1
- User manual x1

Manufacturer	Timekettle
Model	X1 Meeting
Supported languages	52
Supported accents	106
Maximum number of active hosts	10
Maximum number of external participants	50
Total number of participants	60
Translation modes	Multi-person simultaneous translation, two-way one-on-one translation, live translation listening mode, instant on-the-go translation, translation of phone calls and video calls.
Interpretation system	Babel OS
Processor	4-core 12 nm ARM

RAM	3 GB
Internal storage	32 GB
Operating system	XOS (Android-based)
Wireless connectivity	Wi-Fi 2.4 GHz / 5 GHz
Dimensions	128 × 45 × 30 mm
Main unit battery capacity	3200 mAh
Main unit charging port	USB-C
Supported power supply	5V-1A, 5V-2A
Earbud battery capacity	50 mAh
Earbud battery life	approximately 3 hours
Earbud charging specifications	5V-2A
Operating temperature	0°C to 35°C
Storage temperature	-20°C to 45°C
Updates	OTA (Over-The-Air)
Microphone	Microphone with bone conduction technology
Remote device connectivity	phone, tablet, computer
