4TB = Up to 480 Hours of HD Content

Introducing the world's first 4TB drive built specifically for video applications. Video 3.5 HDDs meet the growing demand for more storage in DVR and media centre applications with support for up to 16 HD streams. Capturing, storing and viewing up to 480 hours of your favourite video content has never been easier.

Always On, Always Reliable DVR Storage

Media technology demands both reliability and energy efficiency. Seagate Video 3.5 HDDs deliver some of the industry's lowest overall power consumption profiles, coolest operating temperatures and best AFRs.

Low-power profiles help DVR manufacturers achieve reduced overall power requirements and support Energy Star compliance.

High Performance, Low Power Consumption

Video 3.5 HDDs meet the rising demand for energy-conserving consumer electronics without compromising performance.

Seagate is committed to environmental stewardship that goes beyond reduced power consumption.

By design, the Video 3.5 HDD:

- Contains up to 50% recycled materials
- Uses materials that are 70% recyclable
- Meets all RoHS and new REACH standards
- Is low halogen use
