R1,995

OneOdio A6 Wireless Headphones (black)

OneOdio A6 is a wireless headphone designed for music lovers who want great sound and complete convenience. LDAC (Low Latency Audio Codec, an audio codec) support and Hi-Res (High Resolution Audio, high-resolution sound) certification guarantee fantastic playback quality - both wireless and wired. Add to that advanced noise cancellation, Bluetooth 6.0 connectivity and impressive runtime on a single charge, and you've got a piece of equipment that's up to the task - from daily commutes to work or college, to traveling, to long listening sessions.

Hi-res audio without compromise

The headphones support the LDAC codec, transmitting music at up to 990 kbps, which is nearly three times the data rate of standard SBC (Subband Codec, the primary Bluetooth codec). As a

result, you'll hear more detail, depth and space in every song, regardless of the music genre.

Hybrid noise cancellation

The OneOdio A6 features a hybrid noise cancellation system with five microphones, which eliminates up to 98% of unnecessary outside sounds - down to -48 dB. So you can completely immerse yourself in the music - whether on a crowded bus or in the city center. In addition, the headphones offer Transparency mode, which allows you to listen to your music while staying in touch with your surroundings - perfect for a walk around town or to the office.

Long runtime and fast charging

On a single charge, the OneOdio A6 play for up to 75 hours in non-ANSC (Active Noise Cancelling) mode or about 40 hours with noise cancellation enabled. And when they run out of power, just charge them for about 10 minutes to gain up to 10 hours of playback. This is a great option for long trips and more! You can also connect the headphones wired, via USB-C (Universal Serial Bus Type-C, a universal connector for data and power), so you don't have to worry about running time.

Bluetooth 6.0 and gamer mode

With the latest Bluetooth 6.0 technology, the headphones provide a fast and stable connection to devices. Low power consumption and high bandwidth ensure that music playback, movie watching or calls are always smooth. In addition, audio lag in Game Mode drops to just 0.065 seconds, so that video and audio are perfectly synchronized. This is a feature that will please fans of mobile entertainment and online gamers!

Call quality at the highest level

Thanks to ENC (Environmental Noise Cancellation) technology and a dual microphone, your phone calls will always be clear. Whether you're talking in a crowded shopping mall, on a bus or while walking in the park, your voice will sound natural and clear.

Personalize your sound in the app

The dedicated OneOdio app allows you to customize the equalizer to your preferences. You can choose from 7 preset modes, such as Pop, Bass Boost or Cinema, as well as the ability to create your own settings. You can also update the software from your smartphone.

Comfort and style

Soft ear cups and lightweight design make the headphones comfortable even when worn for hours. A sleek finish with subtle detailing gives them a modern and versatile look, while easy-access buttons provide quick access to key functions such as mode changing, volume control and voice assistant.

Included
