Onikuma G83 Gaming Keyboard (black)

The Onikuma G83 is an advanced mechanical keyboard that combines three connection modes, hot-swappable switches, RGB backlighting, and an 8000 mAh battery. Its multi-layered noise-dampening design ensures quiet operation, while the sturdy PBT keys enhance durability and comfort.

3 operating modes and broad compatibility

The keyboard supports three connectivity options: Bluetooth 5.0, 2.4 GHz, and wired USB-C. This allows you to easily switch between devices and use it on computers, laptops, consoles, and mobile devices. A stable connection and fast key response make the keyboard ideal for both entertainment and work.

Quiet operation

The gasket-mount design with five dampening layers effectively reduces typing noise by up to approximately 30%. The combination of sound-dampening foam, an IXPE layer, PET film, and a silicone base makes the keyboard quieter while maintaining a clear and responsive key feel. This makes it suitable not only for gaming but also for office work or streaming.

Hot-swap and customization freedom

The Onikuma G83 allows for easy switch replacement without soldering, enabling you to tailor the keyboard’s characteristics to your preferences. Support for 3- and 5-pin switches, as well as linear switches, ensures smooth and precise operation. This makes the keyboard a great choice for both beginners and those who like to customize their gear.

RGB Backlighting and Performance

The RGB backlighting offers a variety of lighting effects and the ability to match colors to your workspace, improving key visibility and the overall look of your setup. The 8000 mAh battery provides approximately 40 hours of use with the backlight on or up to 400 hours if you turn it off, so the keyboard doesn’t require frequent charging.

Included

- keyboard
- USB-A receiver
- user manual

Manufacturer	Onikuma
Model	G83
Color	black
Number of keys	83
Switches	linear
