

SYNOLOGY FS3420 All Flash Array 24-Bay Rack Intel Xeon D1739 32GB RAM

Model: FS3420

Manufacturer: SYNOLOGY

EAN: 4711174725342

Product Code: 1088401

R286,944

The Synology FS3420 is designed for high-performance network storage solutions, featuring a robust chassis capable of supporting up to 24 hot-swap expansion bays with 2.5" form factor drives. This system is equipped with a powerful Intel Xeon D-1739 processor that operates at 3 GHz, with the capability to turbo boost up to 3.5 GHz, ensuring efficient management of storage tasks. With 32 GB of DDR4 RAM, it provides ample memory for demanding applications, supporting a maximum storage capacity of 1 PB.

Equipped with dual 10 Gb Ethernet interfaces, the FS3420 ensures speedy data transfer and reliable network connectivity, making it ideal for businesses that require quick access and backup of large files. The built-in cooling fans maintain optimal operating temperatures, safeguarding the system under demanding conditions. Additionally, various networking protocols, including SMB, NFS, and iSCSI, enhance compatibility with different operating environments, while advanced security features
