Affordable AI-PC in Nano Format Powered by AMD Ryzen™ Zen 4 APU

The Shuttle XPC Barebone NA10H7, part of the XPC nano family, is powered by the AMD Ryzen™ 7-8845HS APU, featuring the cutting-edge Zen 4 microarchitecture. With 8 cores, 16 threads, and AMD Radeon™ 780M graphics, it delivers exceptional performance and is primed for AI-readiness.

The integrated Neural Processing Unit (NPU) achieves 16 TOPS of AI performance, while the combined NPU, CPU, and GPU offer a total of 39 TOPS, enabling demanding AI workloads. Supporting up to 64 GB of DDR5 memory, the NA10H7 also boasts a comprehensive array of I/O options, including four UHD graphics ports and two USB4 ports.

Designed as a cost-effective, high-performance solution for generative AI tasks, the NA10H7 excels in a variety of applications, such as content creation, gaming, entertainment, office work, commerce, and AIoT implementations. With its compact nano chassis and advanced connectivity features, it sets a new standard for affordable AI-PCs.
