

Huion Kamvas Pro 24 GEN 3 GT2402 graphics tablet

Model: GT2402

Manufacturer: HUION

EAN: 6930444800055

Product Code: 1092752

R32,710

Huion Kamvas Pro 24 GEN 3 GT2402 graphics tablet

Huion Kamvas Pro 24 (Gen 3) is a state-of-the-art professional tool designed for graphic designers, illustrators and 2D/3D creatives who value high image quality, perfect color reproduction and the comfort of working with a large format. The large 23.8" screen with 4K UHD resolution, full lamination, Quantum Dot technology and the latest generation of Canvas Glass 3.0 make this device a perfect fit for the creative industries, providing an unparalleled digital drawing and graphic editing experience.

4K UHD screen and full color control

The Kamvas Pro 24 features a screen with a resolution of 3840 × 2160 pixels, which offers crystal clear images and excellent sharpness even in the smallest details. The use of Quantum Dot

technology, combined with factory color calibration ($\Delta E \leq 1$) and 3D LUT, guarantees an extremely wide color spectrum - up to 99% Adobe RGB, 99% sRGB, 98% DCI-P3 and 98% Display P3. The color modes can be conveniently switched - Adobe RGB, DCI-P3, sRGB, Display P3 and Black & White, among others - and with the included GTCOLOR colorimeter, users can create and save their own color profiles using the calibration software.

Two professional pens included - precision and convenience in every dash

Included with the Kamvas Pro 24 (Gen 3) are two new-generation digital pens - the PW600 and PW600S. Both operate with PenTech 4.0 technology, offer as many as 16,384 levels of pressure, recognize tilt up to 60° and have high precision even with minimal pressure. The PW600 is a full-size pen with three programmable side buttons and an eraser, ideal for users who prefer a classic grip. The PW600S is a slimmer, lighter version - with two side buttons - designed for those who appreciate lightness and a more compact size. It also comes with a set of interchangeable standard and felt tips to further customize the pen's resistance to your preference.

Realistic work surface with Canvas Glass 3.0

The new generation of Canvas Glass 3.0 provides a realistic drawing experience reminiscent of working on paper. The nano-texture on the surface not only improves the precision of pen guidance, but also eliminates light reflections and reduces smudges. The glass is characterized by increased hardness and scratch resistance - even with intensive use. The anti-scratch layer used makes it easier to keep the screen clean, which is of great importance during long-term work.

Laminated screen - elimination of parallax and even greater accuracy

The Kamvas Pro 24 (Gen 3) screen is fully laminated, which means there is no air gap between the glass and the LCD layer. As a result, the parallax effect is virtually eliminated, and pen movement is perfectly synchronized with the cursor on the screen. Such a solution improves the accuracy of hand movement reproduction, which is especially important when working with details, concept sketches or illustrations that require high precision.

Touch support and advanced control

Kamvas Pro 24 (Gen 3) supports 10-point touch, allowing you to use gestures familiar from smartphones and tablets - such as zooming, scrolling or rotating an image - without using a mouse or keyboard. This feature is currently available on Windows and significantly speeds up the creative process. In addition, the tablet can be paired with a compact Bluetooth keyboard or a single-sided shortcut panel for improved ergonomics.

Ergonomics and robust design

The tablet is equipped with two flip-out stands that allow the device to be positioned at an angle of up to 20°, and thanks to its compatibility with the VESA 100×100 mm standard, mounting on a desk arm or wall bracket is possible. Weighing in at 6.4 kg, the screen remains stable while in use, and the top port arrangement allows for neat cable routing. There are HDMI, DisplayPort, full-function USB-C and two USB-A ports for connecting additional accessories.

Compatibility with graphics systems and software

Kamvas Pro 24 (Gen 3) works with computers running Windows 10 or later, macOS (version 10.12 and above), Linux (Ubuntu 20.04 LTS), as well as selected Android devices supporting USB 3.1 and DP 1.2. The tablet works seamlessly with the most popular creative applications, such as Adobe Photoshop, Illustrator, After Effects, Clip Studio Paint, Krita, Blender, Corel Painter and ZBrush. The ability to configure shortcuts, workspace and pen settings for each application separately allows you to fully customize the device.

Included

- Kamvas Pro 24 (Gen 3) pen tablet
- AC power adapter (AC Power Adapter)
- AC power cord (1.5 m)
- HDMI cable (1.8 m)
- USB-C cable (1.8 m)
- USB-A to USB-C cable (1.8 m)
- PW600 digital pen
- PW600S digital pen
- Standard tips PN06 × 5 (inside the pen case)

- Felt tips PN06F × 5 (inside the pen case)
- Pen case (with built-in clip for tips)
- K40 Keydial Remote
- Cleaning cloth
- Drawing glove
- Quick Start Guide
- G1 GTCOLOR Calibrator

Manufacturer	Huion
Manufacturer's model	GT2402
Screen diagonal	23.8 inches (16:9)
Resolution	3840 × 2160 (4K UHD)
Active working area	525.88 × 295.81 mm
Color gamut:	99% sRGB; 99% Adobe RGB; 98% DCI-P3; 98% Display P3
Pen technology	Battery-Free Electromagnetic Resonance.
Pen	PW600 / PW600S (two pens included)
Pen resolution	5080 LPI
Pressure levels	16 384
Tilt function	±60°
Pen detection height	>9 mm (center)
Accuracy	±0.3 mm (center); ±1 mm (corners)
Reporting frequency	>260 PPS
Contrast ratio:	1000:1
Brightness	250 nits (typical)
Touch	10-point fingertip touch (10 Points Finger Touch)
Screen coating	3rd generation anti-glare glass + anti-fingerprint layer
Lamination	Full Lamination
Built-in stand	integrated, inclination 20°

Compatible operating systems	Windows 10 or later; macOS 10.12 or later; Android 6.0 or later (USB 3.1 + DP 1.2); Linux (Ubuntu 20.04 LTS)
Case color	black
Net weight of the device	6.365 kg
Device dimensions	589.2 × 364 × 22.7 mm
