The AOC Gaming 24G50F monitor features a 24-inch LED-backlit LCD display that brings your gaming experience to life with vibrant colors and clarity. With a native resolution of 1920 x 1080 and a brightness of 300 cd/m², every detail is enhanced for an enjoyable viewing experience. The monitor supports 16.7 million colors and offers a wide viewing angle of 178 degrees, ensuring accurate colors and consistent image quality from almost any angle.

Equipped with VESA Adaptive-Sync technology and a fast response time of 0.5 ms, this monitor minimizes stuttering and tearing during intense gaming sessions. Enhanced by Flicker-Free technology and anti-glare screen coating, extended use becomes comfortable and easy on the eyes. Additional features like Crosshair Display and AOC Shadow Control also cater to gamers looking for precision and control in their gameplay.
