monitor.

Experience real color with Mega DCR

Mega DCR delivers new levels of color and picture quality to your viewing experience with images that are real-to-life. Mega DCR's contrast ratio shows blacks at their absolute darkest and pristine whites and other colors at their brightest. You will notice a boost in the contrast level and clearer picture clarity. It is like an explosion of colors that makes other screens seem dull in comparison. Enjoy your content with the professionalism it deserves.

Upscale your view with better quality and picture

Magic Upscale improves image quality to such a level that you will only receive a better picture. Enjoy enhanced image quality no matter how the original picture quality is. Magic Upscale prevents image degradation when scaling up and gives only brilliant and pristine colors and images. And it also makes images on the monitor appear clearer and sharper than on a note pc. Shine with Samsung LED Monitor Series 1.
