ASUS ProArt Router PRT-BE5000 wireless router 2.5 Gigabit Ethernet Dual-band (2.4 GHz / 5 GHz) Black

Model: 90IG0AG0-MO9C10

Manufacturer: ASUS

EAN: 4711636407038

Product Code: 1142808

R4,223

Creator-First Networking

The ProArt Router PRT-BE5000 serves as the intelligent foundation of a creator-ready studio network. It is built for stability, responsiveness, and intensive workflows — from large file transfers to live collaboration. Enabling effortless control and seamless ecosystem expansion, the PRT-BE5000 delivers security and scalability to keep your studio connected and creativity uninterrupted.

IEEE 802.11BE

Beyond-Fast WiFi 7

Powered by WiFi 7, the ProArt Router PRT-BE5000 delivers up to 5000Mbps of reliable wireless performance for creator-driven workflows. Whether transferring large project files, hosting video calls, or collaborating in real time, every task can run smoothly—from high-resolution content creation to managing a multi-device studio environment.

Creator First

Intelligent Networking for Creative Setups

Built around a creator-first philosophy, ProArt networking prioritizes creative workflows automatically with Adaptive QoE for smoother file transfers and collaboration. ProArt Control Center software offers a professional UI for intuitive router control, while the ProArt ecosystem intelligently recognizes and accelerates ProArt devices—delivering faster, more secure data transfers throughout your studio.

Creator-First

Adaptive QoE prioritizes creator traffic in real time to keep creative workflows smooth. By dynamically optimizing bandwidth, it delivers consistent performance across connected devices in a studio setup, without impacting other users on the network.

ProArt Router Control Center

Easily manage network traffic, monitor usage, and visualize data with a clear, user-friendly dashboard.

Creators’ Networking Solution

Designed with creators in mind, ProArt Networking devices deliver the high-speed foundation required for modern workflows. When pairing ProArt routers and switches, users can create a unified ecosystem that empowers ProArt workstations and AI NUCs to work in perfect harmony.

ProArt Series

ProArt Router PRT-BE5000 adds networking to the ProArt family of laptops, displays, cases, graphics cards, motherboards, and AIO coolers, completing the ecosystem for creator workflows.

Multi-gig Network

Wired Expansion for Creative Workflows

The ProArt Router PRT-BE5000 offers flexible wired connectivity with multi-gig ports to support creator studio workflows. A paired ProArt Switch can easily expand available ports, allowing more devices — from workstations to NAS servers — to connect seamlessly within a scalable, studio-ready network.

Smart Home Master

Smart Home Master SSIDs

ASUS Guest Network Pro software streamlines the process of creating or connecting to dedicated SSIDs or VLANs, offering advanced features like IoT device control, instant VPN connections and an intuitive guest portal.

VPN Network

A preferred VPN service can be connected with a single click for secure and private internet access through a dedicated subnetwork.

IoT Network

Set up and manage multiple devices under one secured SSID to provide enhanced security with commercial-grade protection.

Kid’s Network

Create a dedicated SSID for your kids and easily manage screen time without needing to configure each device individually.

Network Security

Triple-Level Protection

ASUS Network Security delivers triple-level protection backed by a commercial-grade cloud database, safeguarding your network 24/7. Built for creator environments, it helps protect valuable

project files, connected devices, and studio workflows from cyber threats.

One-Tap Security Scan

A one-tap router security assessment identifies vulnerabilities in your security settings, helping to prevent malicious activities or connection attempts made by infected devices.

Safe Browsing & AdGuard

Customize protection for individual users or a group of devices with safety filters to secure your online activities.
NOTE: By using Safe Browsing, you acknowledge and agree that the standard for blocked and filtered content is established by a third-party DNS provider.

DNS over TLS

DNS over TLS (DoT) brings enhanced privacy and security to your online world by encrypting your DNS (Domain Name System) traffic. The Transport Layer Security (TLS) protocol helps protect your digital footprint and keep online activities safe from eavesdropping and unwanted data interception by advertisers, ISPs or any potential surveillance.

Mesh WiFi

AiMesh

ProArt Router PRT-BE5000 combines WiFi 7 with next-generation AiMesh technology to create a powerful, scalable network for creator studios. It provides wider coverage, stable connectivity, and secure performance — keeping every device in your workspace connected under one unified network.
