GENESIS Zircon 330 mouse Gaming Right-hand RF Wireless Optical 3600 DPI

Model: NMG-1321

Manufacturer: GENESIS

EAN: 5901969412949

Product Code: 1142842

R1,531

Go wireless with the Genesis Zircon 330, a model that will allow you to play for long periods of time without charging. The 2.4 GHz connectivity, combined with low latency and optical sensor, will provide you with fast response time and the precision you need, while the ergonomic, symmetrical shape will allow you to operate with left and right hands without wrist pain and muscle strain.

THE PRECISION YOU EXPECT

Get more precision with a proven optical sensor that guarantees you high performance even during dynamic shifts of 30 inches per second. Customize its performance to your preference with multi-

level sensitivity adjustment (800 / 1600 / 2400 / 3600 DPI), and that's not all. High acceleration and low latency means even faster response so you can dominate your opponents.

CHOOSE WIRELESS

Choose the future with a 2.4 GHz wireless connection. The built-in 500 mAh battery will keep you playing for a long time. You'll be assisted by smart power saving, which will put the mouse into sleep mode when you take a longer break. And if you are surprised by the low battery power, just use the USB-C port and connect your mouse to the power supply. You don't have to interrupt your gameplay - you can charge the device while it's in progress. Range? Forget about interference and signal loss. The Genesis Zircon 330 receiver will ensure hassle-free play from up to 10 meters away.

HAVE CONTROL OVER THE GAMEPLAY

Use the 7 built-in buttons and assign the most important shortcuts to any of them. More buttons also mean faster response, as you will gain access to each of the necessary actions from the mouse. Quick access will also be ensured by the characteristic contours. In addition, they will make it easier to lift the mouse and allow you to play for hours without wrist pain, regardless of whether you use your right or left hand.
