SYNOLOGY RS826RP+ 4-Bay NAS-Rackmount AMD Ryzen Embedded V1500B 4GB DDR4 ECC SODIMM

Model: RS826RP+

Manufacturer: SYNOLOGY

EAN: 4711174726929

Product Code: 1142932

R39,993

The Synology RackStation RS826RP+ is designed to enhance productivity with its efficient network storage capabilities. With a quad-core Ryzen Embedded processor clocked at 2.2 GHz, it provides robust performance for demanding applications. The NAS server supports up to 4 hot-swap drive bays accommodating 2.5" and 3.5" devices, ensuring flexible and convenient storage management. Equipped with two USB 3.2 Gen 1 ports and multiple Ethernet connections, it offers versatile connectivity options for various needs. The built-in fans maintain optimal operating conditions, while the device operates within a temperature range of 0°C to 35°C with minimal sound emissions at 41.2 dBA, ensuring a quiet working environment.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Security and data management features are prioritized, featuring advanced snapshot technology, antivirus analysis, and hardware encryption to keep data secure. It supports multiple network protocols including SMB, NFS, and iSCSI, making it suitable for diverse networking environments. Furthermore, cloud services integration such as Google Drive and Dropbox enhances data accessibility and backup efficiency. Ideal for businesses and heavy users looking for reliable and expandable network storage solutions, the Synology RackStation RS826RP+ delivers functionality tailored to meet contemporary data storage demands.
