

Seagate S-series Archive HDD v2 8TB internal hard drive 128 MB 3.5" Serial ATA III

Model: ST8000AS0002

Manufacturer: SEAGATE

Product Code: 11432

R5,187 ~~R5,845~~

Affordable Active Archive Hard Drives for Cloud Storage

Industry's first high-capacity hard drive designed for cost-effectively storing active archive data and cloud content.

- High-density 8TB hard drives for petabytes of affordable and accessible long-term online storage
- Enables significant system-level TCO savings with best cost-per-TB
- Maximum storage efficiency with lowest watts-per-TB
- Reliable, low-power data retrieval based on Shingled Magnetic Recording (SMR) technology
- RV-balanced for high density environments

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Cost-Effective High Capacity 8TB Hard Drive

Lowest cost/TB online data archive solution for petabytes of growing archival storage helps to ensure affordable long-term data management.

SMR-enabled technology ensures efficient and economical cold storage operations even in the harshest data centre environments.

Energy-Efficient High-Density Cloud Hard Drive

The 3.5-inch Archive HDD is optimised for cold data storage with the lowest power consumption and the on-demand, time-to-ready PowerChoice feature.

Reliable Data Retrieval for Cold Data Storage

Self-Encrypting Drive (SED) options available for secure data storage and safe, fast and easy drive retirement.

Best fit applications:

- Online archiving
- Large data object storage
- Big data cold storage
- Cloud active archive
- Web-scale archiving

Special features:

- Seagate AcuTrac Technology
- In-Drive Diagnostics (IDD)
- Seagate PowerChoice Technology
- Deferred SATA Activation
- Timestamp
- SeaTools Diagnostic Software
- SMART Drive Monitoring and Reporting
- Hotplug Operation (per SATA Rev. 3.0 Specifications)
- Enterprise CS Phone Support
