Natural and precise reproduction of every movement

Advanced pressure sensitivity (as high as 8192 levels) allows you to precisely vary your lines according to the amount of pressure you apply, for effects similar to traditional drawing techniques. Resolution of 5080 LPI and accuracy of ± 0.3 mm guarantee perfect rendering of even the smallest details. In turn, the 233 PPS reporting frequency eliminates any lag and ensures smooth performance with every pen stroke. It's precision that any artist will appreciate.

A pen that works with you

The PW100 digital pen does not require batteries, and its ergonomic design with a silicone grip ensures comfort even when working for hours. Special buttons with accidental-press protection increase efficiency, and the included PH03 holder with tip extractor allows for convenient storage and quick replacement of worn parts. So you can count on comfortable and skillful work at any time.

Personalization and full control

The Huion H640P features programmable function keys that you can customize, from keyboard shortcuts to controlling specific functions in your favorite software. With a convenient switch, you can also quickly deactivate the shortcuts, allowing you to focus solely on your creative work. The use of such buttons significantly affects the speed and convenience of your work.

Designed with versatility in mind

The tablet supports not only Windows and macOS, but also Android and Linux devices, which increases its functionality and makes it adaptable to any user. You can easily connect it to your smartphone or tablet and create masterpieces in apps such as Photoshop, Illustrator, Clip Studio Paint, Krita, GIMP or SAI - from now on, let nothing limit you!
