

SANDISK NAS 800 NVMe SSD 1.92TB M.2 2280

Model: SDSNP2192TAN-000E0

Manufacturer: SANDISK

EAN: 619659234614

Product Code: 1179200

R13,918

SanDisk NAS 800 is a high-performance NVMe SSD designed for always-on storage environments where capacity, sustained throughput, and data protection matter. It delivers near-enterprise transfer speeds and high IOPS through a PCI Express 5.0 x4 interface and modern 3D NAND architecture, helping storage systems handle heavy read and write workloads with low latency. The drive is built for continuous operation and durability, offering a 1.92 TB capacity, robust endurance rating of 3500 TB, hardware-based TCG Opal encryption, and broad regulatory compliance to support secure, reliable deployment in NAS and server applications.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
